Cover Letter (EN)

Dear Sir/Madam,

I am a Full Stack Web Developer with over 15 years of experience, specialized in building web applications for contests, promotional campaigns, and customer engagement platforms.

I have worked extensively with marketing agencies and event organizers in Italy, managing both frontend (**Angular, Next.js**) and backend (**Laravel, PHP, Core .NET**) development. I design scalable systems that ensure performance and security, and I always comply with privacy regulations (GDPR).

I am looking to collaborate remotely with international agencies and companies, especially in the UK or Germany, that need a reliable technical partner for building contest and promotional systems.

You can find a live demo and full tech details on my site: www.massadev.it

Looking forward to hearing from you.

Best regards,

Sabino Massaro
